Please do not change this rule i have been buying meds from tcs and all the other facilities for a while now!!! Yes im a mass resident but i have a cali med card the main reason i got the card was just to go to Rhode Island dispensarys because all mass dispensarys are trash and have horrible quality meds!!!!!! Ever since my doctor passed me to go to the ri dispensarys ive been so satisfied with everything they have to offer!!! Another reason is all mass bud tenodor are so un aware of there product they are all extremely inexperienced in the game!!! They just give you the “ya bro this is so fire” like sir im not asking if this is fire!! When its in fact trash!!!!

Dear Erica,

As a longtime Rhode Island resident, I'm sad to say that this change would have a great effect on me and could prevent me from getting access as a patient. It would require an unnecessary expense and frankly another hoop to jump through to get legal medication. We need to break down the barriers that are pushing people in need away from the medicine they need. Marijuana is also on the verge on becoming legalized, creating more barriers will simply drive patients away from legally taxed source and into either the streets or over the Massachusetts where it is legal to recreationally purchase. This is simply unfair and provides an added expense to all it would affect.

Sincerely,
[REDACTED]

Hello,

I am writing in regards to the proposed changes in the Medical Cannabis regulations that would require a patient with an out-of-state recommendation to accompany a corresponding state license.

This change would cripple many patients in the state, making access to this care nearly impossible. It would add money, time, and resources on behalf of the patient that are unjust and unfair. This would likely result in patients needing to access their medication by means that may not be safe or legal, thus not on the best interest of the state.

Thank you for your time and consideration,

[REDACTED]

Hello, I am a Rhode Island MMJ Patient who would like to see the out of state ID law to remain the same. As you may know, acquiring an in state ID can be very expensive, especially when your primary doctor has biased views of Marijuana and wont sign off a Marijuana Recommendation. Because of this, out of state IDs are the reasonable and cheaper way to do this. Rhode Island doctors have strong biases on negative effects of marijuana from doctors I've had and many friends/family of mine. Requiring an out of state ID with an out of state Medical Card is simply inefficient and unfair. Its extremely costly to have a secondary ID, almost equivalent to paying an IN state mmj doctor. If it were easier to access a primary doctor mmj recommendation, out of state ID's wouldnt be in such demand right now, but its simply time consuming and inconvenient to get an instate, and I believe adding this law will only make it harder and expensive on patients. Please keep the laws in place that exist now, thank you!

To whom it may concern,

I feel the need to weigh-in on the proposed regulations to require patients in RI with out-of-state recommendations to provide a second form of ID from the state where the recommendation came from. I am a medical cannabis patient with an out-of-state card, I require medical cannabis for debilitating pain and the proposed change would not only be harmful for patient access (mine and countless others) but it would cause extensive expense and delay to the my continued treatment and it is simply unfair.

I hope that you will take this into consideration and will not move forward with the proposed regulation.

Sincerely,

[REDACTED]

Subject: [EXTERNAL] : Public Comment - Proposed Medical Cannabis Regulations

Hey Erica , This is very impactful to the community because not only it limits patients access to medicine. It's also taking away money from the state of Rhode Island and the dispensaries so it really does affect those who are on a monthly fixed income and it defeats the whole purpose of going to the dispensary in the first place. Most RI residents don't have enough to afford an medical marijuana license in RI and if ids are a big deal just make it recreational for the state for those who do go to the dispensary for there medication.

To whom it may concern,

It is very sad that the state of Rhode Island has made it such an inconvenience for RI residents who have an out of state recommendation. It is very unfair that I have to jump through hoops just to get the medication that I lawfully have a right to.

Not that I should have to justify myself, however personally I attended an out of state university where my anxiety became a problem prompting me to turn to alternative remedies. This is not only an inconvenience but will have a negative impact on my overall wellbeing.

Respectfully,

[REDACTED]

To whom it may concern,

I am an out of state medical cannabis patient and changing regulations would be very harmful; raising patient costs a significant amount, making it harder for patients to access their medicine whether it be a delay in getting it or taking away all access to patients (like me), and lastly it is simply not fair to those who rely on medicinal cannabis who won't be able to get it anymore!

These regulation changes would harm Rhode Island's medical marijuana patients as well as Rhode Island's medical dispensaries.

Thank you.

To whom it may concern,

I am an out of state patient at Rhode Island dispensaries. I am incredibly concerned to learn about new potential regulations for out of state patients. This is harmful to the people, like myself, who need medication but do not possess an ID from the state in which their recommendation was given. This requirement would cause an added expense and delay, and is simply unfair. It may lead patients to resort to dangerous, illegal means of acquiring medication. This is dangerous and I am incredibly disappointed that this is the direction our government is going.
