Hi, hope all is well. I, along with many others do not want to see the new requirement for patients with out-of-state recommendations. I think this change is harmful to patient access, would cause added expense and delay, and is simply unfair.

Sincerely,

[REDACTED]

I think that we all need to make medicine a number one priority for patents that need it. I don't think that this new law will help, it will make it worse! Less money for the state if this goes into affect! Let's NOT change anything, let's NOT put this law into affect, and KEEP it the same! Want to have money keep rolling in, we'll let patents use their cards that they currently use!

The state loves and needs money, so why would you want to loose out on making more money!

I am a dual resident of both California where I've had my medical marijuana recommendation for years now. I live in Rhode Island most of the year and when work brings me out to California I go, as I've done for many years. This new proposal is unjust and not fair for true medical patients.

To whom it may concern,

Changing the requirements for patients with out-of-state recommendations will not only be harmful to patient access, but it will cost more and delay me from getting the treatment I need. It is very unfair to those who depend on medical marijuana for an improved quality of life.

Best Regards,

Requiring a second form of Identification for out of state patients is extremely inconvenient and will prevent access to some of the best medicine available in the area, for many patients.
I travel for a living and rely on reciprocity for access to my medicine.

Hello, I am an out-of-state patient & I would hate for this ban to happen. I currently have a California Cannabis ID & live in Rhode Island. While enrolled in school, I did a term in California where I received my medical recommendation. Having to return back to RI, i was able to use my id, now i don't know if this will be possible & its hard to renew my recommendation in RI at this moment. I can't afford to pay for a new Dr. to see me if they don't accept my insurance. Thank you for your time.

Hello,

As a MMJ patient I would not want to see the new requirement for patients with out-of-state recommendations come into effect. Many of my friends are frequent travelers, and it is more convenient for them to have CA cards. However because they don't live there they have RI licenses. This change would greatly impact the amount of patients receiving their medicine. Many times, patients opt for out of state cards because they are cheaper compared to that of Rhode Island's cost. If this new law is put into effect, it would greatly increase the cost to get a MMJ recommendation, there for leaving some patients without access.

Thank you

Please don't change this rule it is very important to me I suffer from ptsd and severe social anxiety normal tasks are very hard for me without my medicine. I originally lived in California where I had gotten my card and moved to Rhode Island to be with family after my grandmother passed it worked out for me so I didn't have to pay the 2 payments of 250\$ for a Rhode Island state medical card please don't change this rule it will effect more than you will know.

I have to agree with the state on this... There isn't any reason why ri patients should have Cali cards... I haven't to pay for it, so should they... I'm on disability and still think ri patients should have ri cards... There shouldn't be an easy way to get your medical Marijuana card... I had to wait and search for a Dr that thought the mmp was beneficial, not every Dr believes in the MMP (which it's a fact that MM WORKS AND HELPS THOSE WHO NEED IT) works (closed mindedness, educate yourselves) so I can understand why the Cali card has become an issue... But if I have to to pay top dollar for my card and I am benefiting from Marijuana as a pain med then I have to do what I have to do to keep renewing it in RI... LIKE EVERYONE ELSE SHOULD WHO HAS BENEFITED FROM TAKING MARIJUANA FOR PAIN, PTSD, CANCER, AND ETC.

To whom it may concern,

Please do not change the rules and keep them as they are right now.
Focus on limiting cigarette products, tackle the things that cause cancer not the thing that helps treat it.

Financially, the dispensary will be limited to only so many patients and the money they take in that goes a lot to RI.

Thanks.

Hello,

I saw that there was proposed policy change regarding out of state medical cards. Unfortunately I moved from California and have already changed my ID to Rhode Island - the change doesn't make any sense since my medical Marijuana card doesn't expire for almost a year.

I oppose this change - I hope the state reconsiders.

Regards,

Hello my name is [REDACTED] I currently live in [REDACTED] Rhode Island I am typing this email in regards to the new law in process of getting passed. I understand that the law is requiring someone with a out of state recommendation for medical marijuana they need another ID from which the recommendation came from. The problem that I have with that is I cannot afford to take a trip to California just to get another ID. I also can't take the time out of work and if I would take that time out from work I would need at least a few months notice to get everything covered. I also live in Rhode Island now so I wouldn't have any ownership of anything for that matter in California so I wouldn't not be able to acquire another form of ID. If there's any questions feel free to email me back thank you for taking the time to read this and have a nice day.

Hello, showing both my ID's from in-state and out of state isn't capable. This rule change would hurt me as a patient because my mom lives in Rhode Island and my stepmom and dad live in California, I split time with 6 months in Rhode Island and 6 months in California. This rule change would hurt a lot of patients and I appreciate your consideration. Thank you.

Hi my name is [REDACTED] I'm 26 and I have a CA medical card in RI. I am against the new proposal for the second ID with out of state medical cards. I live paycheck to paycheck and i simply cant afford to spend \$200-\$250 every year to renew my license. I do qualify for the RI medical cards and whatnot, but its too expensive!!!!!! CA charges much less than RI and for me its the ideal choice. I have several prescriptions i completely stopped taking because having my medical card gave me access to a much better alternative (atleast for me that is.) Now if the proposal were to continue to alter the regulations, I strongly believe that the price for the appointment/ medical card should be reduced to a much more reasonable price.

To whom it may concern,

It is very unrealistic in this time to petition for in state ID only for medical marijuana. We are leaning on a close then ever pass for federal and recreational use. Why should out of state patients suffer from relocating. Insurance is expensive as well as our medicine. I feel it is unreasonable and warrants no benefit. Hopefully the federal government beats you to the punch!

I am writing in defense of patients access to their meds, and having two forms of ID is just a way of blocking them from doing so. Matching the recommendation to the person is all that is needed, adding another form to match the recommendation is NOT going to do any good. Please keep laws the way they are and allow legal cannabis patients access in RI.
