

FACT SHEET

In re: Proposed revisions to Air Pollution Control Regulation No. 26 "Control of Organic Solvent Emissions from Manufacturers of Synthetic Pharmaceutical Product"

Introduction

The Department of Environmental Management (DEM), Office of Air Resources, is proposing to amend one of its air pollution control regulations, 250-RICR-120-05-26 "Control of Organic Solvent Emissions from Manufacturers of Synthesized Pharmaceutical Products" (Part 26). Part 26 limits volatile organic compound emissions from the manufacture of synthesized pharmaceutical products.

Description of Proposed Amendments

The were no substantive changes to the regulation. Portions of the regulation that no longer apply have been eliminated. The regulation has been updated to current RI Code of Regulations (RICR) format which required the addition of an incorporated materials section.

Demonstration of Need

In 2016 the state revised the Administrative Procedures Act to require that every state regulation be rewritten into the new RIRC format by December 31, 2018 or it will no longer be enforceable. In order to meet this requirement Part 26 is being revised to the required RICR format.

Alternative Approaches Considered

No alternative approaches were considered.

<u>Identification of Overlapped or Duplicated State Regulations</u>

The Office of Air Resources has identified no state regulations that overlap or duplicate the proposed amendments.

<u>Determination of Significant Adverse Economic Impact on Small Business or Any City or</u> Town

The proposed revisions do not impose any new requirements on regulated entities including any small businesses or any city or town, therefore there is no significant adverse economic impact.
