

# FACT SHEET

**In re: Proposed revisions to Air Pollution Control Regulation No. 23 “Control of Perchloroethylene Emissions from Dry Cleaning Operations”**

## **Introduction**

The Department of Environmental Management (DEM), Office of Air Resources, is proposing to amend air pollution control regulation, 250-RICR-120-05-23 “Control of Perchloroethylene Emissions from Dry Cleaning Operations” (Part 23). Part 23 limits perchloroethylene emissions from dry cleaning operations.

## **Description of Proposed Amendments**

There were no substantive changes to the regulation. Portions of the regulation that no longer apply have been eliminated. The regulation has been updated to current RI Code of Regulations (RICR) format.

## **Demonstration of Need**

In 2016 the state revised the Administrative Procedures Act to require that every state regulation be rewritten into the new RICR format by December 31, 2018 or it will no longer be enforceable. In order to meet this requirement, Part 23 is being revised to the required RICR format.

## **Alternative Approaches Considered**

No alternative approaches were considered.

## **Identification of Overlapped or Duplicated State Regulations**

The Office of Air Resources has identified no state regulations that overlap or duplicate the proposed amendments.

## **Determination of Significant Adverse Economic Impact on Small Business or Any City or Town**

The proposed revisions do not impose any new requirements on regulated entities including any small businesses or any city or town; therefore, there is no significant adverse economic impact.
