RULE 6. GENERAL MANAGEMENT AND LICENSING REGULATIONS

(6.1) Management Controls

(6.1-1) Fishery Endorsements

- (a) Fishery endorsement categories shall include:
 - (i) Lobster;
 - (ii) Non-Lobster Crustacean -- all crustacean species, as well as horseshoe crabs, available for commercial harvest, except lobster;
 - (iii) Quahaug;
 - (iv) Non-Quahaug Shellfish – all shellfish species available for commercial harvest, except quahaug;
 - (v) Restricted Finfish – scup, summer flounder, winter flounder, tautog, striped bass, and black sea bass;
 - (vi) Non-Restricted Finfish – all species of finfish and squid available for commercial harvest except the six species specified in the restricted finfish endorsement category.
- (b) By rule, the Department may add, eliminate, or modify fishery endorsement categories; in doing so, the Department will consider the status of each fishery, levels of participation by existing license holders, and the provisions of applicable fisheries management plans and programs.

(6.1-2) Harvest and Gear Levels

- (a) The Full Harvest and Gear Level will apply to holders of Principal Effort Licenses for the fisheries for which they hold endorsements; and to holders of Multi-Purpose Licenses for all species.
- (b) The Basic Harvest and Gear Level will apply to holders of Commercial Fishing Licenses for the fisheries for which they hold endorsements; and to holders of Student Shellfish and 65 and Over Shellfish Licenses.
- (c) By rule, the Department shall set, and may periodically adjust, Full and Basic Harvest and Gear Levels on a fishery- or endorsement-specific basis, consistent with state and/or federally sanctioned fisheries management plans or programs.

(6.1-3) Regulation of Gear

(6.1-4) Times and Seasons

(6.1-5) Area Closures and Restrictions

(6.1-6) Quotas

(6.1-7) Catch and Landings Limits

(6.1-8) Limits On Entry

- (a) By rule, the Department may limit entry into a fishery by license type or endorsement category, where a state and/or federally sanctioned fisheries management plan finds that fishing effort is at or exceeds sustainable levels.
- (b) By rule, the Department may establish entrance/exit ratios, lotteries, waiting lists, or other allocation measures as a means for limiting entry pursuant to subsection 6.1-8(a).
- (c) Any/all limits on entry for each license type and/or endorsement shall be annually prescribed herein in Rule 7.

(6.1-9) Control Dates

- (a) By rule, the Department may establish control dates, which shall serve as cut-off dates for establishing potential eligibility criteria for future access to a fishery.
- (b) Eligibility criteria may include, but are not limited to, historic participation and/or gear levels as documented by transaction records and official state or federal logbooks.
- (c) The establishment of a control date is intended to promote awareness of potential eligibility criteria for future access to a fishery and to

discourage speculative shifting of effort into that fishery. To this end, the Department may give various weighted considerations to those active in the fishery before and after the control date.

- (d) Establishing a control date does not commit the Department to any particular management regime or criteria for limiting future access to a fishery; however, once enacted, control dates may only be used to limit future access to a fishery in accordance with a state fisheries management plan.

~~(e)~~

- (e) Control dates may only be established prospectively.

(6.1-10) Exit/Entry Ratios

- (a) Restricted finfish – For every five licenses, eligible to harvest restricted finfish, that are retired, one new restricted finfish license/endorsement will be issued.
- (b) Quahaug- For every three licenses, eligible to harvest quahaug, that are retired, one new quahaug license/endorsement will be issued.

(6.1-11) Annual Promulgation of Rules

Availability of new licenses and endorsements, harvest and gear levels, regulations affecting gear, times and seasons, area closures and restrictions, quotas and catch or landings limits, limits on entry, control dates and data reporting shall be established by rule as hereinafter described on an annual basis, no later than November 1 for the following year, provided that said regulations may run for longer periods where management conditions permit, or may be adjusted more frequently where such conditions require.

(6.2) Management Plans

(6.2-1) Required

The management controls set forth in subsection 6.1 must be based on fishery management plans that have been adopted by the Department or by a federal agency or regional body of competent jurisdiction. Such plans may be species- or fisheries-specific or apply to whole endorsement categories.

(6.2-2) Purpose and Content

- (a) The central objectives of all fishery management plans shall be
 - (i) to prevent overfishing, while achieving on a continuous basis

- the maximum sustainable yield from each fishery; and (ii) to restore overfished or depleted stocks to sustainable levels.
- (b) Management plans shall be responsive to, and reflective of, changing stock and fishery conditions, and thereby support an adaptive management process.
 - (c) Management plans shall seek to achieve the objectives set forth in subsection (a) above by establishing management measures that may include a mix of input and output controls, such as limitations or restrictions on effort, gear, catch, areas, times, and/or seasons.
 - (d) Management plans shall specifically address, and make annual determinations on, the number and availability of licenses and endorsements, and the harvest and gear levels associated therewith. Such determinations shall be made in accordance with the objectives set forth in subsection (a) above, and with due regard to: (i) the social and economic well-being of fishers and fishing-dependent communities, particularly the interests of licensed residents who wish to continue fishing commercially in a manner that is economically viable; and (ii) the interests of residents who wish to fish commercially.
 - (e) In considering the economic and social impacts of licensing and other management measures on fishers and fishing-dependent communities, as well as on the general public, management plans shall to the maximum extent feasible employ methodologies that are consistent with those employed by the National Marine Fisheries Service.
 - (f) Management plans shall be based on the best scientific information available.
 - (g) Management plans shall consider the effectiveness of management measures in reducing by-catch, by-catch mortality, and discards.
 - (h) Management plans shall complement federal and regional management plans and programs and the reciprocal arrangements with other states.
 - (i) Management plans shall be consistent with the national standards for fishery conservation and management set forth in the Magnuson-Stevens Fishery Conservation and Management Act (16 USC, section 1851) and further delineated in RIGL §20-2.1-9(2)(iv).
 - (j) Management plans may take into consideration other factors that the Director deems appropriate.

(6.2-3) Procedure for Adopting

- (a) Management plans shall be adopted by rule consistent with the requirements of the Administrative Procedures Act and as herein

described on an annual basis no later than November 1 for the following year, provided that said plans may continue in effect for longer periods if it is determined that management conditions permit or may be adjusted more frequently if it is determined that management conditions require.

- (b) Plans shall be submitted to the Rhode Island Marine Fisheries Council [RIMFC] for review and advice at least sixty (60) days prior to any Department hearing on said plans.
- (c) RIMFC may recommend to the Director that a proposed plan be adopted, modified or withdrawn, and the Director may proceed to hearing on the plan as originally proposed or as revised by RIMFC, or both, provided that in all instances both the plan as originally proposed and as recommended by RIMFC shall be entered into the hearing record.
- (d) In adopting a proposed plan, the Director shall include a concise explanation of the principal reasons for its adoption and his or her response to positions entered into the hearing record.

(6.3) Emergencies

The Director may promulgate marine fisheries management rules with less than sixty (60) days notice to RIMFC if and to the extent necessary to comply with federal or regional requirements or to respond to sudden and/or imminent peril or unanticipated developments where delay would likely cause immediate harm to fishery resources or fishers pursuant to RIGL §42-35-3.

(6.4) Annual Report

(6.4-1) Content

The Director shall prepare an annual report on the conservation and management of marine fisheries resources for the General Assembly and the citizens of the State. The report will address particularly the status of fish stocks that are considered to be overfished or were so in the preceding year, the status of fisheries management plans and programs, levels of participation by existing license holders, and the availability of new licenses and endorsements. The report will also summarize available data on the value of commercial fishing in the State, and the socio-economic status of the State's fisheries.

(6.4-2) Due Date

The annual report on marine fisheries resources shall be issued no later than September 15 for the calendar year preceding.

(6.5) Use of License, Landing Permit and Vessel Declaration Fees

(6.5-1) Annual Spending Plan

- (a) License and vessel declaration fees must be used by the Department in accordance with an annual spending plan adopted with the advice of RIMFC.
- (b) The Department will submit its annual spending plan to RIMFC no later than September 1 for the following fiscal year.

(6.5-2) Activities Eligible For Funding

License, landing permit and vessel declaration fees are to be used by the Department for the following specific purposes:

Said plans may or may not provide for the issuance of certain new licenses or endorsements in any given year, depending on the status and economic condition of each fishery.
- (b) New licenses and endorsements shall be made available as of January 1 for that year pursuant to management plans and associated rules adopted no later than November 1 of the preceding year, subject to the provisions set forth herein, and as further delineated in Rules 7 and 8 herein for each license year.

- (b) Second priority in the issuance of new Commercial Fishing Licenses with applicable endorsement(s) shall be given to resident crew members who have been actively participating in any commercial fishery. - (c) In issuing new licenses pursuant to this subsection, the Department may do so at a lower harvest and gear level than the license surrendered by the seller where necessary to accomplish the purposes of a management plan adopted pursuant to section 6.2. New licenses issued pursuant to this section are not subject to the application deadline provisions set forth under section 6.7-3.
