Hello,
I'm a 35 year old Male with a teenage daughter and a wife who also vapes.we both use to smoke.2nd hand smoke was horrible for our daughter to breathe not only that but people in my family have died from lung cancer and didnt even smoke....all due to everyone else in the family smoking around d them all day all night.....so we quit smoking for our health and our daughter's health....as an adult I think we should be able to choose what flavor vape liquid we want to vape....we pay our taxes, we work every day almost,and have been smoke free for over 6 years now!fruity pebbles liquid helped me and my wife get off cigarettes.we keep at least 10 to 15 flavors each on hand so when we get tired of one flavor we move to the next...without these flavors adults will go back to smoking therefore more cancer and other health problems that comes with smoking. Please dont make this mistake. Adults in America should have the choice.why?cause its America the land of the free...not to mention how many businesses will close?come on this is literally good for noone....there is way way way more cons then pros....so please for the love of God don't ban flavors.please reconsider this ban.#wevapevote always remember that.
